ProDSS Calibration Worksheet

When the Environment Demands It

This calibration worksheet can help document your calibration and track the performance of your sensors. Please follow the detailed calibration procedures in the ProDSS manual or your facility's standard operating procedure (SOP) to ensure all calibrations are as accurate and as consistent as possible.

Refer to the YSI Solution Expiration Dates document to ensure your calibration solutions are fresh. In addition to using fresh standards, never accept an out-of-range or questionable calibration results.

Calibration Date	Technician:
Handheld Serial Number:	Handheld Software Version:
Cable Serial Number:	
<u>Temperature</u>	
Reading when sensor is dry and in room	temp air: Accurate? Y N
Conductivity	
Reading when sensor is dry and in room	temp air: Acceptable value is <u>less</u> than 1
Actual Reading in solution before calibra Reading in calibration solution after calib	· —
•	and after calibration: uctivity/temperature sensors (626902) is 4.5 to 6.5 uuilt-in) sensors on ODO/CT assemblies is 4.4 to 6.4
Optical Dissolved Oxygen Barometric pressure:	
Actual Reading before DO% calibration in Reading in DO% calibration environment	is accepted: t after calibration is completed:
ODO gain in GLP record after calibration	: Acceptable range is 0.75 to 1.50
рН	
	ngs during calibration

		Actual Redaings	during canbracion	
<u>Buffer</u>	<u>Calibration Value</u>	<u>pH</u>	<u>pH mV</u> **	Acceptable pH mV in buffer
7				-50 mV to 50 mV
4				+165 to +180 from pH 7 buffer mV value
10				-165 to -180 from pH 7 buffer mV value

pH slope in GLP record after calibration:___ Acceptable range is ~ 55 to 60 pH/mV (Ideal is 59.16 mV/pH)

μS/cm

^{04/11/16 03:22:39}PM Calibrate pH Calibration value [10.03] Accept Calibration Finish Calibration Press ESC to Abort Last Calibrated Actual Readings 22.8 Ref °C -199.0 pH mV 10.40 pH Post Cal Value 10.03 pH 10.2 9.8 Ready for cal point 3

^{*}GLP stands for Good Laboratory Practice file. This calibration record contains important information about the calibration result.

^{**}The pH mV at the time of calibration (Sensor Value) can also be seen in the final pH GLP record.

ProDSS Calibration Worksheet

When the Environment Demands It

Actual Reading in solution before calibration is accepted: Reading in calibration solution after calibration is completed:_____ ORP Cal Offset in GLP record after calibration: Acceptable range is -100 to 50

Turbidity

<u>Calibration</u> value (FNU)*	Actual Reading during calibration
0	
12.4*	
124*	
1010	

Acceptable range for **Actual Reading** during calibration of the first point is -10 to 10 FNU

*Note: The turbidity sensor can be calibrated to 3 points. Either 12.4 or 124 FNU standard can be used for the second point, but not both. Other calibration values can be used when calibrating.

Depth (Completed in Air)

Actual Reading before calibration is accepted:_____ Reading in air after calibration is completed:_____

Ammonium

	Actual Readings during calibration			
<u>Concentration**</u> (i.e. Calibration Value)	mg/L	<u>mV</u> ***	Acceptable mV when the sensor is new	
1st point: 1 mg/L			-20 mV to 20 mV	
2nd point: 100 mg/L			+90 to +130 from mV value in 1 mg/L standard	

Nitrate

	Actual Readings during calibration		
<u>Concentration</u> ** (i.e. Calibration Value)	mg/L	<u>mV</u> ***	Acceptable mV when the sensor is new
1st point: 1 mg/L			180 mV to 220 mV
2nd point: 100 mg/L			-90 to -130 from mV value in 1 mg/L standard

Chloride

	Actual Readings during calibration		
Concentration** (i.e. Calibration Value)	mg/L	<u>mV</u> ***	Acceptable mV when the sensor is new
1st point: 10 mg/L			205 mV to 245 mV
2nd point: 1,000 mg/L			-80 to -130 from mV value in 10 mg/L standard

^{**}Other standard concentrations can be used. A 2 point calibration without chilling a third calibration solution is extremely accurate and is the preferred method. However, if there is a large temperature variation during sampling, a chilled third calibration point is recommended.

^{***}The mV at the time of calibration (Sensor Value) for each point can also be seen in the GLP record after a calibration is complete.
